

Manual—Smart 2in1 In-Ear Headset

Congratulations on choosing Milicom headsets for your 'critical communications' needs! We are the industry leader for superior communication in demanding environments delivering unrivaled performance in all industry sectors!

1. Product Contents

- ◆ Milicom In-Ear Microphone Headset with Push-To-Talk (PTT) function using the Milicom Housing Module PTT Platform and In-Line Answer/End Button
- ◆ One (1) of each size of Comply® foam ear tips (S, M, L)
- ◆ Ear Hook(s) - depending on config, 1 for single ear, 2 for dual ear
- ◆ One (1) clothing clip to attach cable to lapel for secure fit and placement
- ◆ One (1) battery (CR1632), already installed in housing module box

Comply® foam ear tips

Ear hook

Clothing clip

2. Headset Setup

- A) First, choose the large (L) sized foam ear tip (Tip: Starting with the largest size makes sure that the occlusion (sealant) of the ear is correct.)
- B) Roll the foam ear tip between your fingers to compress it, then insert it into your ear canal. (Tip: use your opposite hand to pull your ear up while inserting the compressed foam ear tip to help support a better fit) The foam will slowly expand. The fit should be snug but comfortable. If it feels too tight and on the border line of painful, try the next size down (medium or small depending on which ear tip size was used). (Tip: You can leave the ear tip in your ear as is, or route the cord over your ear to help keep it from falling out and/or install the ear hook for even more stability.)

A.

B.

- C) Plug the 3.5mm headphone plug into your phone. Make sure it's all the way into the jack.
- D) Clip the Milicom Housing Module PTT Platform Box onto your belt, waist or shirt. The rubber button on this module is your PTT button or when using In-Ear Mic on a phone call.

*PTT Button for PTT communication

- 1-Press and hold to pick up the line and talk
- 2-Release button to release the picked up PTT line

*PTT Button for Phone Voice communication (after transferring from an open air mic to the In-Ear mic. [*See below for instructions](#))

- 1- Press and hold to talk while using the In-Ear Mic (this will be a half-duplex call, so to hear other side, you will need to release button)
- 2- Release button to hear others talk

The **Open Air Mic** is only operational during phone calls (inbound & outbound) and gives you full duplex communication like any hands-free headset. This microphone will not isolate any surrounding/ambient noise so in loud noise or windy environments, you may need to switch to the In-Ear Mic.

The **Open Air Mic** is only operational during phone calls (inbound & outbound) and gives you full duplex communication like any hands-free headset. This microphone will not isolate any surrounding/ambient noise so in loud noise or windy environments, you may need to switch to the In-Ear Mic.

The **Answer/End Call** button answers an incoming phone call and/or hang up an existing phone call. It also allows you to toggle between using the open air mic when a phone call is initially answered to the in-ear mic without having to interrupt or miss listening to the phone call. ***(Press and hold this button for 1 second and release, which will produce a 'pop' sound in the ear which means that the transfer from either open air mic to in-ear mic or in-ear mic to open air mic took place successfully.** (Remember, when transferring the call from open air mic to in-ear mic, you will need to press the PTT button on the module housing to speak, otherwise no sound will be heard whatsoever on the other side!)

To get the most out of your Milicom In-Ear mic headset, below is a quick overview of how to answer and end a non-push to talk phone call:

To get the most out of your Milicom In-Ear mic headset, below is a quick overview of how to answer and end a non-push to talk phone call:

- ◇ To answer a phone call, tap (a short press and release) the Inline Control Button one time.
- ◇ To end the call on most phones, a quick press and release of the Inline Control Button on the headset will end the call.
- ◇ On some phones you may have to double click the inline button to end the call and on some phones a double click may mute the phone.
- ◇ **NOTE:** To end a call on some phones, like Kyocera and Blackberry, the user may have to end the call directly on the phone.
